FERTILIZE LIKE THE PROS

What the Pro's Know

- Grass needs an even, continuous flow of nutrients. This is best accomplished with a mix of time-release nitrogen sources.
- Don't forget phosphorus (P) and potassium (K). Potassium (the last number) is recommended to be 1/3 - 1/2 the amount of nitrogen.
- Feeding in the fall is the most important time to feed.

Major Universities Recommend:

Spring - .5 lb. to 1 lb. of nitrogen
 Summer - 0 nitrogen
 Fall - 1.5 lbs. to 2.5 lbs. of nitrogen
 Amount of slow release - 1/3 minimum

Once In Spring, Once In Fall

- Fairway Formula Fertilizer is a mix of technologies appropriate to the season to provide even, steady nitrogen release. This allows you to fertilize once in spring and once in fall to give your lawn the primary nutrients it needs.
- Fairway Formula's specially formulated time-release nitrogen is what golf courses use to keep fairways beautiful and healthy all year long.
- Some Fairway Formula Fertilizers are available with weed controls to meet your specific lawn care needs.

APPLICATION INFORMATION

Established Lawns

For best results, apply Greenview Fairway Formula Spring and Fall Fertilizers in spring and early fall at the appropriate rate.

New Lawns

Apply the fertilizer over the soil and rake into the top inch of soil before seeding or sodding. Water regularly until germination to keep the seed bed moist. Do not use weed control until the grass is established.

Drop Spreader Settings

Apply in a single pass at a rate of approximately 3.8 lbs. per 1,000 sq. ft. Start on the outside border and apply in a circular path working toward the center. Overlap the coverage slightly, and shut off spreader before making hard turns.

Drop Spreader	Setting
Greenview® Drop Spred® XP1	16½
Greenview® Drop Spred® III	7
Agri-Fab® Drop	5
Red Devil Drop (1-20)	10½
Republic Drop	8½
Scotts Drop PF	7

If your spreader model is not listed, go to our website at www.lebsea.com, or call toll-free 800-233-0628, 8 A.M. - 5 P.M. EDT, Monday - Friday, for additional model settings.

Spreader Recommendations

Follow directions to avoid over fertilizing which may harm your lawn. Spreader settings are approximate. Due to condition of spreader, speed of application, roughness of lawn, etc., you may want to adjust setting for desired coverage.

Caution Do not hand spread. And be careful to keep fertilizer out of reach of children or pets. Store unused fertilizer safely.

Broadcast Spreader Settings

Apply in a single pass at a rate of approximately 3.8 lbs. per 1000 sq. ft. Start on the outside border and apply in a circular path working toward the center. A little overlap coverage is desirable.

Broadcast Spreader	Setting
Greenview® Jet-Spred® SS1	16
Greenview® Jet-Spred® III	6½
Agri-Fab® Rotary	4½
Cyclone Rotary	5
Earthway Rotary	16
Lesco Rotary	J
Red Devil Rotary (1-20)	9½
Republic Rotary	5
Sears Craftsman Rotary	4½
Scotts SpeedyGreen®	9

To calibrate your spreader: 1 lb. of material should cover approximately 263 sq. ft.

LAWN CARE SUGGESTIONS

Mowing Tips

Let clippings stay on lawn for additional nutrients and to conserve landfills. Keep mower blades sharp to avoid tearing. Don't mow grass shorter than 2 1/2" in height. Don't cut more than 1/3 of height per mowing.

Weed Control

Applying weed control when you fertilize saves time and effort. Check out the full line of Greenview Fairway Formula Fertilizers with weed control to find the one that's best for your lawn's specific needs.

Spring 26-4-12

WHAT IS SLOW RELEASE NITROGEN?

Greenview Fairway Formula Fertilizers utilize unique, slow release nitrogen sources developed for professionals.

MESA™ Provides rapid, deep greening. Feeds up to 6 weeks.

METH-EX® Slow, continuous feeding activated by warming soil temperatures. Feeds up to 12 weeks.

IBDU® Feeds in cool, wet weather. Great for early spring and winter. Feeds up to 16 weeks.

19.4% Slowly Available Nitrogen / 26% Total Nitrogen
= 3/4 of the Nitrogen is Slow Release
