

Fairway Formula
GREENVIEW[®]
Late Fall Fertilizer

Booster Application
Only fertilizer that feeds
in cool weather

Promotes root growth for winter
hardiness and quick spring green-up

Extended time-release feeding
of nitrogen throughout winter
into early spring

Covers 5,000 sq. ft.

Net Weight 16.25 lbs.
(7.39 kg.)

31-0-0

1 lb. Nitrogen/1,000 sq. ft.
9/10 of the Nitrogen is Slow
Release

Fairway Formula GREENVIEW® Late Fall Fertilizer

FERTILIZE LIKE THE PROS

What the Pro's Know

- Grass needs an even, continuous flow of nitrogen. This is best accomplished with a time-release nitrogen source.
- Feeding in the fall is the most important time to feed.

Major Universities Recommend:

Spring - .5 lb. to 1 lb. of nitrogen
 Summer - 0 nitrogen
 Fall - 1.5 lbs. to 2.5 lbs. of nitrogen
 Amount of slow release - 1/3 minimum

Once In Spring, Once In Fall

- Fairway Formula Fertilizer provides even, steady nitrogen release. This allows you to fertilize once in spring and once in fall to give your lawn the nitrogen it needs.
- Fairway Formula's specially formulated time-release nitrogen is what golf courses use to keep fairways beautiful and healthy all year long.
- Some Fairway Formula Fertilizers are available with weed controls to meet your specific lawn care needs.

APPLICATION INFORMATION

Established Lawns

For best results, apply Greenview Fairway Formula Spring and Fall Fertilizers in spring and early fall at the appropriate rate.

New Lawns

Apply the fertilizer over the soil and rake into the top inch of soil before seeding or sodding. Water regularly until germination to keep the seed bed moist. Do not use weed control until the grass is established.

Drop Spreader Settings

Apply in a single pass at a rate of approximately 3.25 lbs. per 1,000 sq. ft. Start on the outside border and apply in a circular path working toward the center. Overlap the coverage slightly, and shut off spreader before making hard turns.

Drop Spreader	Setting
Greenview® Drop Spred® XP1	30
Greenview® Drop Spred® III	10
Agri-Fab® Drop	4
Red Devil Drop (1-20)	10½
Republic Drop	7½
Scotts Drop PF1	10½

If your spreader model is not listed, go to our website at www.lebsea.com, or call toll-free 800-233-1067, 8 A.M. - 5 P.M. EDT, Monday - Friday, for additional model settings.

Spreader Recommendations

Follow directions to avoid over fertilizing which may harm your lawn. Spreader settings are approximate. Due to condition of spreader, speed of application, roughness of lawn, etc., you may want to adjust setting for desired coverage.

Caution Do not hand spread. And be careful to keep fertilizer out of reach of children or pets. Store unused fertilizer safely.

Broadcast Spreader Settings

Apply in a single pass at a rate of approximately 3.25 lbs. per 1000 sq. ft. Start on the outside border and apply in a circular path working toward the center. A little overlap coverage is desirable.

Broadcast Spreader	Setting
Greenview® Jet-Spred® SS1	18½
Greenview® Jet-Spred® III	6
Agri-Fab® Rotary	5
Cyclone Rotary	5½
Earthway Rotary	18½
Lesco Rotary (letter/numeric)	G/15
Red Devil Rotary (1-20)	5
Republic Rotary	5
Sears Craftsman Rotary	5
Scotts SpeedyGreen®	6

To calibrate your spreader: 1 lb. of material should cover approximately 308 sq. ft.

LAWN CARE SUGGESTIONS

Mowing Tips

Let clippings stay on lawn for additional nutrients and to conserve landfills. Keep mower blades sharp to avoid tearing. Don't mow grass shorter than 2 1/2" in height. Don't cut more than 1/3 of height per mowing.

Weed Control

Applying weed control when you fertilize saves time and effort. Check out the full line of Greenview Fairway Formula Fertilizers with weed control to find the one that's best for your lawn's specific needs.

WHAT IS SLOW RELEASE NITROGEN?

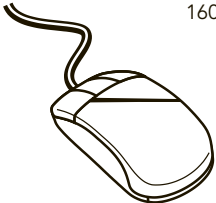

Greenview Fairway Formula Fertilizers utilize a unique, extended release nitrogen source developed for professionals.

IBDU* Feeds in cool, wet weather. Great for feeding throughout winter and early spring green-up. Feeds up to 16 weeks.

$$28\% \text{ Slowly Available Nitrogen} / 31\% \text{ Total Nitrogen} = 9/10 \text{ of the Nitrogen is Slow Release}$$
