## MULTI-PURPOSE FERTILIZER

Give your ornamental plants the best with GreenView® Multi-Purpose Fertilizer, a high-quality general-purpose fertilizer with added nutrients of magnesium, sulfur, iron, and manganese to boost plant vitality. Controlled-release nitrogen ensures steady, long-term feeding, so your plants stay healthy and beautiful for the long haul. Our proprietary formula delivers nutrients gradually, providing lasting results.

- **Improve overall plant health and appearance**
- **Encourage lush foliage and vibrant blooms**
- **Support root development and recovery from stress**

GROUND COVERS

HOW TO APPLY FOR BEST RESULTS

- For Flower Beds & Landscaping: Mix into the soil 1–4 inches deep when planting annuals, ensuring even distribution.
- For Individual Plants: Sprinkle evenly around the dripline (the area beneath the outer edges of the branches) for trees and shrubs. Since feeder roots can spread beyond the dripline, adjust as needed.
- For Ground Covers & Dense Plantings: Broadcast evenly over the area at 1.4 - 2.9 lbs. per 100 sq. ft. for balanced nutrition.
- For Vegetable Gardens: Before planting, mix 1 lb. per 100 sq. ft. into the soil. For ongoing feeding, use ½ lb. per 100 sq. ft.

**Pro Tip:** Apply when plants are actively growing in spring and fall. Avoid fertilizing stressed plants (due to heat, drought, pests, or disease), and don't spread granules onto wet foliage.

BROADCAST (for heavily planted beds)			SHRUBS (per plant within dripline)		
N rate lbs./1000 sq. ft.	Lbs./100 sq. ft.	Lbs./1,000 sq. ft.	Size	Rate	Measure
2 lbs./1000 sq. ft. ....	1.4 lbs. ....	14.3 lbs.	8-12" .....	4 Oz. ....	½ Cup
3 lbs./1000 sq. ft. ....	2.1 lbs. ....	21.4 lbs.	13-18" .....	6 Oz. ....	¾ Cup
4 lbs./1000 sq. ft. ....	2.9 lbs. ....	28.6 lbs.	19-24" .....	8 Oz. ....	1 Cup
			25-30" .....	10 Oz. ....	1 ¼ Cup
			31-36" .....	12 Oz. ....	1 ½ Cup
			37-42" .....	16 Oz. ....	2 Cups
			>42" .....	1 Cup per foot of branch spread	

One cup is approximately 8 oz. by weight.  
Shrub size refers to branch spread for shrubs where height and spread are approximately the same. For fastigate or decumbent forms reduce the amount by approximately ½.
