

# GREENVEW

# MULTI-PURPOSE & STARTER FERTILIZER 1 2 - 1 2 - 1 2

EXCELLENT FOR USE ON TREES, SHRUBS, VEGETABLES, FLOWERS, AND ORNAMENTAL GARDENS

THIS BAG COVERS UP TO 15,714 SQ. FT. WHEN USED AS A STARTER FERTILIZER FOR TURF

NET WT. 33 LBS. (14.97 Kg)

### **QUALITY RESULTS**

The general purpose formula of GreenView 12-12-12 contains important nutrients to feed most of the plants you grow. Use this product to feed your vegetable gardens and flower beds, trees and shrubs, and as a starter fertilizer when you are seeding new lawns.

### **USE INSTRUCTIONS**

### FOR ANNUAL FLOWERS

Work fertilizer into soil at the rate of 1½ lbs. (2¾ cups) per 100 sq. ft. (10 ft. by 10 ft. area) during final preparation of plant beds. During the growing season, make additional applications at the rate of ½ lb. (1½ cups) per 100 sq. ft. every eight weeks.

### FOR ESTABLISHED PERENNIAL FLOWERS AND SHRUBS

Apply evenly in early spring at the rate of  $1\frac{1}{2}$  lbs. ( $2\frac{3}{4}$  cups) per 100 sq. ft. Make supplemental applications of  $2\frac{1}{3}$  lb. ( $1\frac{2}{3}$  cups) per 100 sq. ft. every six weeks. Stop feeding one month before frost.

### FOR BULBS AND TUBES - BED PLANTING

Work fertilizer into topsoil at rate of 1\% lbs. (3\% cups) per 100 sq. ft. of bed before planting.

### FOR ROW PLANTING

Apply fertilizer in trench or row at the rate of 11/4 lbs. per 100 linear feet. Mix fertilizer in soil at bottom of trench and cover with approximately one-half inch of soil before planting bulbs.

### FOR VEGETABLE GARDENS

Before turning soil, broadcast 1½ lbs. (2¾ cups) of fertilizer per 100 sq. ft. (10 ft. by 10 ft.) or after turning, work 1½ lbs. of fertilizer per 100 sq. ft. into soil to a depth of 4 to 5 inches before planting.

For vegetables planted in rows, add  $\frac{2}{3}$  lb. per 100 sq. ft. of row in trenches two inches deeper than the seed or plant and two inches to the side of the row. Long growing crops (tomatoes, corn, carrots, cabbage) should also be sidedressed with  $\frac{2}{3}$  lb. fertilizer per 100 ft. of row at six weeks intervals.

### **FOR TREES**

Apply monthly at the rate of 3.3 lbs. per 1000 sq. ft. and directly under the drip line of trees.

# FOR NEW LAWNS AS A STARTER FERTILIZER

- Apply to the seedbed at the rate of 5.8 lbs. per 1,000 sq. ft. For best results apply with a spreader and work into soil before seeding. For turf applications, bag covers up to 5,690 sq. ft.
- Feed again with a lawn maintenance fertilizer when grass is at least 3 inches high.
- Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product to your lawn or garden, and sweep any product that lands on the driveway, sidewalk, or street back on to your lawn or garden.
- Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices. Check with your county or city government to see if there are local regulations for fertilizer use.
- Do not apply to frozen turf.

### In Florida

A soil test is recommended prior to planting grass.

Do not apply fertilizer prior to planting grass.

For seeded, plugged or sprigged grasses, wait until there is a uniform turf cover before application (the length of time required to achieve this will vary based on the time of year, environmental conditions and location in state). For sodded and new grass apply at the rate of 2.1 lbs per 1,000 sq.ft. Application of a nitrogen based fertilizer with zero phosphate is recommended after 30 days to ensure continuing growth. Do not exceed 0.25 lb  $P_2O_5$  per application or 0.5 lb  $P_2O_5$  per year.

Applications should be made during the summer, spring, or fall seasons. No more than 2 applications annually.

# In Maryland

Apply at the rate of 2.1lbs per 1000 sq. ft. This bag covers up to 15,714 sq. ft. Do not exceed 0.25 lb P<sub>2</sub>O<sub>5</sub> per application or 0.5 lb P2O5 per year.

Not for use on established lawns. Apply as a starter fertilizer only during the first growing season.

Note: Supplemental applications of lawn fertilizer are needed to achieve a minimum 0.9 lb nitrogen per 1,000 sq. ft.

Application only within the first year of seeding and not to exceed two applications.

Do not apply to frozen turf.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn or garden, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn or garden.

## **KEEP OUT OF REACH OF CHILDREN**

### WARRANTY

**NOTE** To the extent consistent with applicable law, Buyer assumes all responsibility for safety and performance if this product is not used according to the directions.

**NOTE:** Supplement applications of lawn fertilizer are needed to achieve a minimum 0.9 pound nitrogen per 1,000 sq. ft.
