

GreenView® SOLUTIONS STARTER FERTILIZER

QUALITY RESULTS

GreenView® Starter Fertilizer is specially formulated to encourage root growth and establishment of newly-seeded lawns or lawn sections you are restoring by re-seeding. The 10-18-10 ratio of nutrients and phosphorus content is an analysis that promotes new seed establishment.

FOR ESTABLISHED LAWNS:

This product is for new lawns or re-seeded areas. For best results on established lawns, choose one of our GreenView® fertilizers with GreenSmart® technology. See the list below for suggested products and application times.

- GreenView® Crabgrass Control plus Lawn Fertilizer with GreenSmart® – apply early Spring
- GreenView® Broadleaf Weed Control plus Lawn Fertilizer with GreenSmart® – apply in Spring
- GreenView® Lawn Fertilizer with GreenSmart® – apply Spring, Summer or Fall
- GreenView® Fall Lawn Fertilizer with GreenSmart® – apply in Fall

FOR NEW LAWNS (AND LAWN SECTIONS YOU ARE RESTORING BY RESEEDING):

Spring and fall are the best times to seed new lawns. Application of GreenView® Starter Fertilizer on new lawns is beneficial since you have the opportunity to work it into the soil where roots develop. Apply the contents of this bag at a rate of 3.2 lbs. per 1,000 sq. ft.

After lawn has been established and mowed about 2 to 3 times (4 to 6 weeks after seeding or sodding) apply one of our select GreenView® fertilizers with GreenSmart® technology per the package directions.

FOR TREES

GreenView® Starter Fertilizer is formulated to also fertilize trees in late fall, winter or spring. Fall fertilization should be made after trees are dormant (leaves have fallen).

Fertilize trees as follows:

- Two cupfuls = approximately one pound.
- Newly-planted trees – ½ lb. per inch of trunk diameter
- To 6-inch diameter – 2 lbs. per inch of trunk diameter
- Over 6-inch diameter – 3 lbs. per inch of trunk diameter

The best method to fertilize trees is to drill holes with a 2-inch soil auger or punch holes with a cylindrical object. Make the holes approximately 18 inches deep and 18 inches apart around the base of the tree, 2 to 3 feet beyond the spread of its branches.

Place an equal amount of GreenView® Starter Fertilizer in each hole and refill with loose soil.

An alternate method is to spread GreenView® Starter Fertilizer on the soil surface beneath the tree at 2 to 3 times the lawn rate.

FOR SHRUBS AND EVERGREENS

Apply GreenView® Starter Fertilizer in late fall or winter before the ground freezes.

DO NOT FERTILIZE UNTIL PLANTS ARE DORMANT.

Feeding prior to dormancy may force growth and cause winter kill. Apply any time in the spring.

Use at the rate of 3 lbs. per 100 sq. ft.

In New Jersey, New York, Pennsylvania and Virginia: This fertilizer contains phosphorus and may not be used for lawn maintenance on turf except when:

- 1) Providing nutrients to specific soils and target vegetation as determined to be necessary in accordance with a soil test that was conducted by a laboratory* performed no more than 3 years before the application
- 2) Establishing vegetation for the first time, such as after land disturbance, provided the application is conducted in accordance with the recommended application rates established by the State.
- 3) Re-establishing or repairing a turf area.

In Maryland:

- 1) Established vegetation for the first time, such as land disturbance, provided the application is conducted in accordance with the recommended application rates established by the State.
- 2) Re-establishing or repairing a turf area.
- 3) The annual limit for phosphorus for starter lawn fertilizers is 2 lbs. per 1,000 sq. ft.
- 4) In Maryland, this product is to be used as a starter fertilizer on newly established lawns only.

In New Hampshire: DO NOT exceed an application rate of 0.25 pounds of P₂O₅ per 1,000 square feet per application and 0.5 pounds P₂O₅ per 1,000 square feet per year.

DO NOT apply to frozen turf.

Check with your local Cooperative Extension Agency to obtain specific information on local turf best management practices.

Check with your county or city government to see if there are local regulations for fertilizer use.

DO NOT apply near water, storm drains or drainage ditches. DO NOT apply if heavy rain is expected.

Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.

DO NOT HAND SPREAD.

SUGGESTED SPREADER SETTINGS

The below spreader settings are approximate.

Suggested settings were calibrated and field tested.

However, age and condition of spreader, speed of operation and evenness of terrain may require slightly different settings for desired coverage.

Check your spreader on 312 sq. ft. and adjust to apply at a rate of 1 lb. of material per 312 sq. ft. (3.2 lbs. of material per 1,000 sq. ft.)

Note: Supplemental applications of fertilizer are needed to achieve a minimum of 0.9 pound of Nitrogen per 1,000 sq. ft.

Broadcast Spreader	Setting (3.2 lbs./1000 sq. ft.)
Scotts Turf Builder EdgeGuard	4.75
Scotts White Hand-Powered	5
Scotts Elite	5
Sta-Green 32lb Precision	5
Agri-Fab 45-0463 130 lb. Tow Behind	3.5

Drop Spreader	Setting (3.2 lbs./1000 sq. ft.)
Scotts Turf Builder Classic Drop	6
Yardworks 75lb	4
Agri-Fab 175 lb Tow Behind 45-0288	3.5

NOTE: If your spreader model does not appear above, please call toll free 800-223-1067, 9 A.M. – 5 P.M. EDT, Monday – Friday for additional model settings.
