

GreenView SOLUTIONS NATURAL BASE LAWN FERTILIZER

- Our Natural Base Lawn Fertilizer can:
- Provide quick acting repair and renewal.
 - Reduce stress caused by drought, heat, and cold.
 - Promote increased root growth and vigor.
 - Be applied Spring, Summer, or Fall.

GreenView® Solutions Natural Base Lawn Fertilizer Contains Slow Release Nitrogen. Soluble fertilizers release their nutrients in a brief spurt after water is supplied. This often causes stress to the turf grass by promoting growth at the expense of root development and plant vigor. Unlike soluble fertilizers, the slow release nitrogen in GreenView® Solutions Natural Base Lawn Fertilizer is released slowly as it biodegrades in the soil, so it continues to be effective over a much longer period of time. In addition to providing plant vigor and stress resistance, the predominantly insoluble nature of GreenView® Solutions Natural Base Lawn Fertilizer is far less susceptible to leaching and run-off compared to soluble fertilizers.

Apply initial application of GreenView® Solutions Natural Base Lawn Fertilizer at the recommended application rate below. For maximum effectiveness, prepare your lawn by aerating or de-thatching before applying GreenView® Solutions Natural Base Lawn Fertilizer.

For the quickest results, water soon after application and regularly thereafter.

Signs of turf stress will begin to lessen in one to two weeks. Within four to six weeks turf grass will show significant visual improvement. A second application may be required to achieve best performance.

Follow the GreenView® Solutions Natural Base Lawn Fertilizer Lawn Restoration Program for effective results. Repeated applications will help reduce stress from periods of drought, heat and severe cold.

Not for use in organic crop and organic food production.

APPLY ONLY AS DIRECTED

Application Recommendation:

For Stressed Turf: Make an initial application at the rate of 6.0 lbs per 1,000 sq. ft to yield 0.9 lbs. Nitrogen per 1,000 sq. ft.

3-4 Annual Application Plan: Apply 3 to 4 times per year at the rate of 5.0 lbs. per 1,000 sq. ft to yield 0.75 lbs. Nitrogen per 1,000 sq. ft.

4-6 Annual Application Plan: Apply 4 to 6 times per year at the rate of 3.3 lbs. per 1,000 sq. ft to yield 0.5 lbs. Nitrogen per 1,000 sq. ft.
