

TURF NURTURE[®]

Natural Base Fertilizer
Pet & Children Friendly

15-0-7

Lawn Restoration Formula
Brings Tired Lawns Back to Life

- Apply Spring, Summer or Fall
- 7/10 of the Nitrogen is Slow Release

NET WEIGHT 25 LBS. (11.3 KG)
Covers up to 7,500 sq. ft.

TURF NURTURE®

Lawn Restoration Formula

- Turf Nurture® provides quick acting repair and renewal.
- Reduces stress caused by drought, heat and cold.
- Promotes increased root growth and vigor.
- Gives your lawn a second chance!

Turf Nurture® Contains Slow Release Nitrogen

Soluble fertilizers release their nutrients in a brief spurt after water is supplied. This often causes stress to the turf grass by promoting growth at the expense of root development and plant vigor. Unlike soluble fertilizers, the slow release nitrogen in Turf Nurture is released slowly as it biodegrades in the soil, so it continues to be effective over a much longer period of time. In addition to providing plant vigor and stress resistance, the predominantly insoluble nature of Turf Nurture is far less susceptible to leaching and run-off compared to soluble fertilizers.

Turf Nurture® Lawn Restoration Program

Spread 25 lbs over 5,000 sq ft	1. Early Spring			
Spread 25 lbs over 5,000 sq ft	Week 6	2. Late Spring		
Spread 25 lbs over 5,000 sq ft		Week 12-16	3. Summer	
Spread 25 lbs over 5,000 sq ft			Week 24-32	4. Fall

Apply initial application of Turf Nurture at the recommended application rate below. For maximum effectiveness, prepare your lawn by aerating or de-thatching before applying Turf Nurture.

For the quickest results, water soon after application and regularly thereafter.

Signs of turf stress will begin to lessen in one to two weeks. Within four to six weeks turf grass will show significant visual improvement. A second application may be required to achieve best performance.

Follow the Turf Nurture Lawn Restoration Program for effective results. Repeated applications will help your lawn recover from stress resulting from periods of drought, heat and severe cold.

APPLY ONLY AS DIRECTED
APPLICATION RECOMMENDATION:

For Stressed Turf: Make an initial application at the rate of 25 lbs. per 4,190 sq. ft., (6.0 lbs per 1,000 sq. ft.) to yield 0.9 lb. Nitrogen per 1,000 sq. ft.

3-4 Annual Application Plan: Apply 3 to 4 times per year at the rate of 25 lbs. per 5,000 sq. ft. to yield .75 lb. of nitrogen per 1,000 sq. feet.

4-6 Annual Application Plan: Apply 4 to 6 times per year at the rate of 25 lbs. per 7,500 sq. ft. to yield .5 lb. nitrogen per 1,000 sq. ft.

Do not apply more than 0.9 pound of nitrogen per 1,000 sq. ft. per application.

To hasten results, aerate soil before application and water afterward.

SPREADER SETTING INFORMATION:

Read Before Using Product: The following spreader settings are approximate and will vary with equipment condition and application techniques. You may need to adjust these settings to achieve the desired coverage.

TYPICAL SPREADER SETTINGS:

Lbs. of Nitrogen / 1,000 sq. ft.	3/4
sq. ft. coverage/25 lb. Bag	5,000

Rotary Spreaders:

Scotts Speedy Green 1000	5
Scotts Speedy Green 2000	7
Scotts Speedy Green 3000	7
Scotts 74101	7
Scotts Deluxe Edgeguard	7
PSB Prizelawn CBR111	N
Earthway Deluxe 2050U	18
Scotts AccuPro 2000 / R-8	P
Even Spread	18
Agri Fab (Target) 450388 Sears	7

Drop Spreaders:

Scotts 1000 Accu Green	13
Scotts Accu Green 2000	13
Scotts Accu Green 3000	13
Earthway 7300	6

For spreaders that are not listed, measure a length of 100 ft. Two pounds of Turf Nuture should cover two, 2-foot wide by 100 foot long swaths (400 sq. ft).
